Junior Back-end Developer

I am a Junior Back End Developer with 1 year of professional experience who is dedicated, to my work. I have a foundation in NodeJS. I am passionate about creating efficient and scalable server side solutions. I have an understanding of web development principles. I am always eager to learn more. My goal is to use my skills to contribute to a development team. I believe that my ability to collaborate effectively solve problems and adapt to challenges allows me to deliver high quality code and contribute to the operation of web applications. My aim is to leverage my expertise in Node.js and my enthusiasm, for software development in order to contribute to projects that enhance user satisfaction and drive business growth.

WORK EXPERIENCE

TSP DIGITAL PERFORMANCE AGENCY • District 7, Ho Chi Minh City • Full-time • 03/2023 – 07/2023

Junior Back-end Developer

- Unfortunate the entire technical team was layoff due to financial reasons.
- Developed and implemented a robust micro-service using NestJS and Kafka as a Message Queue
- Integration of AI tools into the development process, resulting in a 15% reduction in manual tasks and a 50% decrease in time-to-market for new features.
- Actively engaged in knowledge sharing through internal workshops, contributing to an enhanced team-wide understanding of clean coding practices and efficient development techniques.

Hitek Group JSC • Tan Binh District, Ho Chi Minh City • Full-time • 08/2022 – 03/2023

Fresher NodeJS Developer

- Demonstrated expertise in NodeJS-based back-end development, delivering stable and efficient systems through clean, reusable code.
- Leveraged SQL database design skills to optimize query response times, resulting in improved system performance and user experience.
- Actively participated in collaborative meetings, contributing valuable insights that fostered effective problem-solving and teamwork.
- Successfully gathered and analyzed user statistics using tools like Google Analytics, driving informed decision-making for strategic planning.

Freelancer Team • Part-time • 05/2021 – Present

Take responsibility as main Back-end Developer with NodeJS as main language with No-SQL or SQL by client's requirements or by the project's requirements

Back-end Developer

- Enhanced project transparency and client satisfaction by creating comprehensive API documentation and easily understandable ERDs.
- Communicated proactively and effectively with clients, translating technical concepts into understandable terms, and ensuring their requirements were met.

EDUCATION

Bachelor's degree in Computer Software Engineering

Ton Duc Thang University • 08/2018 – Present

CERTIFICATIONS

JavaScript (Basic) Certificate

HackerRank • 04/2022 – Present

Rest API (Intermediate) Certificate

HackerRank • 01/2023 – Present

JavaScript Algorithms and Data Structures

freeCodeCamp • 01/2023 – Present

PROJECTS

Worldland.io – NFT Blog

Hitek Group JSC • 05/2022 – 09/2022

I worked on a blog focused on NFTs that aimed to foster communication, among users involved in NFT projects. The blog included events and additional features.

My Responsibilities:

- I collected and analyzed user statistics, integrated social network user accounts, optimized the VPS environment, led feature implementation, wrote reusable code, and improved existing features for enhanced platform functionality.

Art Virtue

Hitek Group JSC • 09/2022 – 11/2022

An innovative social network and e-commerce platform designed to facilitate interaction among artists and art enthusiasts, enabling seamless communication, art sharing, and the sale of art-related products.

My Responsibilities:

- Assumed the pivotal role of the sole back-end developer, orchestrating the development of a robust and efficient back-end system to underpin the entire platform.
- Collaborated closely with the Front-end Developer to establish a coherent and user-friendly CMS (Admin Panel), ensuring streamlined content management.
- Collaborated with Mobile Developers, contributing to the development of Android and iOS applications, thus ensuring consistent functionality and user experience across diverse platforms.
